CINEMA: THE WRONGS AND RIGHTS ♡

The idea of human rights are often only noticed when human wrongs highlight their absence. In the case of the **Human Rights Film Festival** at **Riff Raff** and **Kosmos**, the film makers have had a world in flux to point their cameras at over the last few years, and will be exploring the human stories behind the news headlines. Whether it's the war in Syria, LGBT rights, migration, women's rights or the responsibilities of multinationals, the festival focuses on the humans, as much as their absent rights. They'll also have panel discussions after screenings if you want more insight. Most films are in English, or have English subtitles, but not all. So check before going. Full programme [here](#).

Wednesday to Sunday, various times, Riff Raff, Neugasse 57-63, 8005 and Kosmos, Lagerstrasse 102, 8004
